

## Working with nature takes time and commitment...

The Munash philosophy is to simplify gardening with a natural, sustainable and holistic approach. At Munash we are committed to bringing to you the best in natural mineral fertilisers derived from the land, sea and recycling organic material.

< Each of our organic mineral fertilisers will deliver outstanding benefits to your garden, combining them will deliver exceptional results.

We have spent over 25 years developing and refining our natural mineral fertilisers. The origins of our core mineral organic products evolved over 30 million years ago. With these core products containing up to 100 essential minerals and elements, we are about building healthy soils and creating beautiful gardens free from chemicals.

## Creating naturally healthier organic fruit, vegetables, flowers, gardens and lawns.

- Safe for all plant types
- Sustained release fertiliser
- Increases yields in fruit and veggies
- Improves taste
- Increases plant vigour
- Retains moisture in soil naturally
- Increases flowering
- Builds defences against pests
- Resist disease attacks
- No leaf burn
- No chemicals

# BRINGING SOIL BACK TO LIFE

Nourish nature,  
so nature can  
nourish you

**100% Natural**  
**100% Organic**  
**100% Safe**

## How to Rockdust?

Area	Tools	Method
Lawns		Spread at rate of 1kg per 10m <sup>2</sup> every 12 weeks
Gardens		Sprinkle over garden beds and plant foliage
Veggie Beds		Apply to veggies when planting out and setting fruit at rate of 1kg per 10m <sup>2</sup>
New Gardens		Spread at rate of 1-2 kg per 10m <sup>2</sup> , add a light sprinkle to new plants
Repotting		Apply a 1-2 handful per medium size pot, add a little to plant foliage

## How to Renew?

Area	Tools	Method
Lawns		Water lawns every 2 weeks at rate of 3ml per 10 litres
Gardens		Sprinkle over garden beds and plant foliage every 4 weeks
Veggie Beds		Apply to veggies during growing at 3 ml per 10 litres
New Gardens		Apply to plants and soil at 3 ml per 10 litres every 2-3 weeks
Repotting		Apply to all plants at 3ml per 10 litres every 3 weeks

## How to Revitalize?

Area	Tools	Method
Lawns		Top dress lawn area with Revitalize at 10m <sup>2</sup> per bag, gently rake over and finish off with light watering
Gardens		Apply Revitalize @ 5m <sup>2</sup> per bag into top of garden bed and rake through
Veggie Beds		Apply at 5m <sup>2</sup> per bag to surface of prepared beds and dig in, follow up with a light rake. Re-apply Revitalize at 3-5m <sup>2</sup> per bag when replanting veggies and top dress at same rate during growing
New Gardens		Add Revitalize at ratio of 1-5 of soil in new beds, dig in and mix thoroughly. Top dress every 8-10 weeks at 10m <sup>2</sup> per bag
Repotting		Remove old soil and add Revitalize at ratio 1-4 with new potting medium, well mixed and water in
